Sixty percent of this role is making spend explain itself; forty is running the AI that does the explaining. I have shipped both: the attribution framework behind a **\$10M+** digital book, defended by **10** AE desks in QBRs, and a production multi-model platform on Cloud Run with live data connections, the same shape as a **25-skill** Claude graph wired to **15** systems.

Founder & AI engineer

2024 – present

—

Built and run a production multi-model platform on GCP Cloud Run that routes Claude, GPT, Gemini, Grok, and Llama by task fit, with Vertex AI Search retrieval and live data connections.

21

scenarios run by a Gemini-grounded SEM forecaster I built, against **\$2.4M** of live pipeline, so a seller walked into the pitch with spend-to-stage math.

8–10

API keys and **3–4** GCP service accounts behind the scheduled agent workflows I run, including on-call when a connection drifts.

—

Run JobBored's agent fleet in Claude Code against a user-owned Google Sheet.

Digital Sales Manager / \$10M+ digital book

2021 – 2026

\$10M+

digital book owned; reallocated Google, Meta, OTT/CTV, and programmatic against marginal ROAS.

top-3

national rank held by Denver, a **#19**-sized market, on that reallocation.

10

AE desks trained to defend the bidding and attribution framework I wrote for QBRs: last-click vs. assisted, incrementality, and channel-to-stage movement.

130%

YoY paid-search conversion growth and a **13%** new-user lift on a flagship financial-services account.

Senior KAM / KAM / Digital Campaign Manager

2017 – 2021

—

Trafficked Google, Meta, and OTT campaigns, built market reporting, and became the digital SME joining AE client calls.

SEM & web programs

2015 – 2016

—

Ran paid search and WordPress site programs for loan-officer demand generation.
